Jawa Barat, Indonesia | mulyan.t20@gmail.com | mmulyana.com | linkedin.com/in/mmulyana | github.com/mmulyana

Summary

Frontend developer with 3+ years of experience building web products with React.js, Next.js, and TypeScript, including 1+ year of fullstack work. Currently building Linkreator at MEA Digital Marketing and, as a freelancer, an ERP system covering procurement, warehouse, and point of sales.

Professional Experience

MEA Digital Marketing / *An all-in-one platform for creating landing pages, selling products, and etc* **Hybrid**

Junior Frontend Developer

Dec 2025 – Present (11 mos)

- Built a physical products feature for Linkreator, previously limited to digital only products. Creators/Sellers can now list and sell physical goods directly on the platform.
- Built new landing page builder components (CTA buttons, countdown timers, pop-ups), giving creators more building blocks to customize their pages.

Techstack: Next.js, TypeScript

Digirupa Studio / *IT team delivering business digitalization projects through optimized freelance collaboration.*

Remote

Freelance Fullstack Engineer

Dec 2025 – Present (11 mos)

- Developed a procurement module with purchase request and purchase order creation, approval workflow, and warehouse stock integration

Techstack: Next.js, Ruby on Rails, Postgres, Docker

Freelance Frontend Engineer

Sep 2024 – Dec 2025 (1 yr 4 mos)

- Built frontend for warehouse module, including stock in/out, disposal, and stock opname features

Techstack: Next.js, TypeScript

Rakamin / *An education and hiring platform from Indonesia.*

Remote

Intern Frontend Engineer

May 2024 – Aug 2024 (4 mos)

- Improved candidate review experience by replacing page navigation with an inline panel, so recruiters no longer need to open a new page for each candidate and can review faster
- Improved bug reporting by adding photo evidence (stored in S3, shared to Slack), making issues easier for the team to understand and verify

Techstack: React.js, TypeScript, Vite

Bitkreasi / *Software house.*

Remote

Intern Software Engineer

Jan 2024 – Apr 2024 (4 mos)

- Built village profile modules for Asadesa, village management platform, covering village identity, government structure, and institution data

Techstack: Next.js, Express.js, TypeScript

Black Wolf Tech Indonesia / *Software house.*

Remote

Freelance Frontend Developer

Aug 2023 – Dec 2023 (5 mos)

Built web application for <https://ngajiaja.com>, a web-based educational platform

- Teacher onboarding flow, covering registration and verification
- Blog functionality with CRUD post management
- Admin dashboard for monitoring student data

Techstack: React.js, Vite

Kecilin / *Compression technology provider.*

Hybrid

Intern Frontend Developer

Jul 2023 – Oct 2023 (4 mos)

- Built reusable Laravel-based starter template to speed up delivery for future project
- Revamped the Kecilin.id landing page

Techstack: Laravel, Livewire, Node.js

Selected Projects

- **My Note** [Live Demo](#): Personal notes for everyday thinking, built with react.js, typescript, go, postgres
- **My Todo** [Live Demo](#): Simple todo app for daily tasks, built with react.js, typescript, go, postgres

Skills

- **Programming:** React.js, Next.js, React Native, Expo, Vue.js, Nest.js, Go, GraphQL, Javascript, Typescript, HTML, CSS, Tailwind, React Query, Laravel, MySQL, Rest API, Zustand, Redux, Redux toolkit.
- **Tools & Workflow:** Git, Github, Gitlab, NPM, PNPM, Yarn, Vite, Webpack, Postman, Figma.

Education

Ahmad Dahlan University - Yogyakarta, Indonesia

Informatics Engineering Major

GPA 3.61/4.00

2020 - 2025
