Professional Summary

Frontend-focused Full-Stack Engineer with 3+ years of professional experience building modern web applications. Strong background in frontend engineering, with experience delivering end-to-end solutions across e-commerce and ERP systems, particularly in point of sales, procurement, inventory and warehouse management. Focused on creating user-friendly interfaces and reliable software solutions that address real-world business needs.

Professional Experience

MEA digital marketing - Frontend Developer — Dec 2025 – Present

Digital marketing agency with its own products: Linkreator (landing pages and online selling), Sebari, and Tiksmart.

- Built a physical products feature for Linkreator (Next.js, TypeScript), letting creators list and sell physical goods beyond digital-only products, on a platform with ~5,000 sellers.
- Built new components for Linkreator's landing page builder, giving creators more ways to customize and promote their pages.

Digirupa Studio - Fullstack Developer — Dec 2025 – Present

IT team delivering business digitalization projects through freelance collaboration.

- Developed a procurement module (Next.js, Ruby on Rails) with purchase requests, orders, and approvals, integrated with warehouse stock to connect purchasing and inventory in an ERP. Delivered as part of a Digirupa client project.
- Developed a sales module with POS, approval workflow, and reporting, connected to procurement in the same ERP.

Digirupa Studio - Frontend Developer — Sep 2024 – Dec 2025

- Built the frontend of a warehouse module (Next.js, TypeScript) covering stock in/out, disposal, and stock opname, so staff can record and reconcile inventory in one place, for warehouse teams using the ERP. Delivered as part of a Digirupa client project.

Rakamin - Frontend Developer Intern — May 2024 – Aug 2024

Indonesian education and hiring platform for upskilling and talent hiring.

- Replaced page navigation with an inline review panel (React.js, TypeScript), so recruiters can review candidates without opening a new page each time and work through them faster, on a hiring platform.
- Added photo evidence to bug reports (stored in S3, shared to Slack), so the team can understand and verify issues more easily, within the team's bug reporting workflow.

Bitkreasi - Software Engineer Intern — Jan 2024 – Apr 2024

Software house building web applications for clients.

- Built village profile modules (Next.js, Express.js, TypeScript) for Asadesa, covering village identity, government structure, and institution data. Delivered as part of a Bitkreasi client project.

Black Wolf tech Indonesia - Frontend Developer — Aug 2023 – Dec 2023

Software house delivering web application projects for clients.

- Built the web application for ngajiaja.com (React.js, Vite), covering teacher onboarding, a blog, and an admin dashboard for student data. Delivered as part of a Black Wolf Tech client project.

Kecilin - Frontend Developer Intern — Jul 2023 – Oct 2023

Indonesian data compression startup that makes photos, videos, and apps smaller to improve internet access.

- Built a reusable starter template (Laravel, Livewire) to speed up delivery of future projects at the company.
- Revamped the Kecilin.id landing page (Node.js), refreshing the company's public-facing website.

Education

Universitas Ahmad Dahlan - Informatics — Nov 2020 - Nov 2025

- **CGPA**: **3.61/4.00**

Projects

My Note

AI-powered notes app for everyday thinking, inspired by Notion and Google Keep, built with React.js, Go, TypeScript, and PostgreSQL. Live demo: mynote.mmulyana.com

My Todo

Personal productivity app combining tasks, projects, a calendar, and a time tracker, with MCP support, built with React.js, NestJS, TypeScript, GraphQL, and PostgreSQL. Live demo: mytodo.mmulyana.com
